The RESPONSIBLE PARTY will be exempt from any type of responsibility arising from the information published on its website as long as it does not have actual knowledge that this information has been manipulated or introduced by an external third party or, if this is the case, it has acted diligently to remove the data or make access to it impossible.

**Use of cookies** This website may use technical cookies (small information files that the server sends to the computer of the person accessing the page) to perform certain functions that are considered essential for the correct functioning and display of the website. In any case, the cookies used are temporary in nature and are used for the sole purpose of making browsing more efficient and disappear at the end of the user's session. In no case do these cookies themselves provide personal data, nor are they used to collect such data.

They can also be used to measure the audience, traffic parameters, control the history and number of participations, etc., being in these cases technically dispensable but useful cookies for the user. This website does not install unnecessary cookies without the user's prior consent.

Users have the option of configuring their browser so that they are warned before receiving cookies and prevent them from being installed on their computer. For more information, please consult the instructions for your browser.

Users, authorities and security forces to actively collaborate in the removal or, where appropriate, blocking of any content that could affect or violate national or international legislation, the rights of third parties or morality and public order. If the user considers that there is content on the website that could be subject to this categorisation, he/she must immediately notify the administrator.

#### THIS WEBSITE

This website has been checked and tested to ensure that it functions correctly. In principle, proper functioning can be guaranteed 365 days a year and 24 hours a day. However, the RESPONSIBLE PARTY does not rule out the possibility that certain programming errors may occur or that force majeure, natural disasters, strikes or similar circumstances may make access to the website impossible.

#### IP ADDRESSES

The website's servers can automatically determine the user's IP address and domain name. An IP address is a number that is automatically assigned to a computer when it connects to the Internet. All this information is stored in a server activity file that allows subsequent processing of the data to obtain purely statistical measurements that allow the number of page views, the number of visits to the web servers, the order of visits, the access point, etc. to be determined.
